Valentyn Fiedietsov

fedetsov@gmail.com | linkedin.com/in/fedetsov | Portfolio | Remote (B2B via Intend Technologies JDG, Poland)

PROFESSIONAL SUMMARY

Senior Cloud Infrastructure Engineer with 10+ years across telecom, cloud infrastructure, and platform reliability, including 5+ years of production GCP experience. Designed and maintained cloud infrastructure using Terraform IaC (40+ modules hardened), CI/CD pipelines (GitLab CI, GitHub Actions, Cloud Build), and observability stacks (Prometheus/Grafana, ELK) covering 20+ services. Hands-on with GCP networking (VPCs, load balancers, DNS, Cloud Router, NAT, firewall rules), compute resources (GCE, Cloud Run), and containerized workloads on Kubernetes. Google Cloud Professional Cloud DevOps Engineer certified. Architecture-first mindset: designs stacks that minimize maintenance and enable painless integrations. Experience serving as infrastructure platform support layer for software development and data science teams.

CORE COMPETENCIES

- GCP Production Infrastructure (5+ yrs)
- Terraform IaC (40+ Modules Hardened)
- GCP Networking: VPC, LB, DNS, NAT, Firewall
- CI/CD: GitHub Actions, GitLab CI, Cloud Build
- Observability: Prometheus, Grafana, ELK
- Kubernetes (GKE + Bare-Metal/Rancher) + Helm
- Python, Bash Scripting & Automation
- Linux Administration & Docker Containerization
- Platform Governance: ADRs, Tech Radar, IaC Standards

WORK EXPERIENCE

Upwork - Freelance (Global freelancing platform connecting businesses with independent professionals)

Oct 2025 - Present

Senior DevOps / SRE Engineer

Remote

- Delivered cloud infrastructure consulting for multiple client projects - GCP infrastructure design, CI/CD pipeline setup, and Kubernetes operations.
- Designed and deployed GCP cloud infrastructure and CI/CD pipeline for a self-initiated AI-powered habit tracker app - from architecture to production release.
- Conducted infrastructure audits and recommended improvements for security posture, cost optimization, and operational reliability.
- Technologies: GCP, Kubernetes, Terraform, GitLab CI, Helm, Docker, Prometheus, Grafana, Python, Bash.

CARiD (US-based e-commerce platform for automotive parts, serving millions of customers)

Oct 2024 - Oct 2025

DevOps Engineer

Remote

- Designed, built, and maintained GitLab CI/CD pipelines covering build, test, and deployment for ~15 microservices.
- Operated Kubernetes workloads on bare-metal clusters managed with Rancher - cluster provisioning, workload scheduling, resource optimization.
- Managed and migrated ~20 microservices to Helm charts with Vault-based secrets management, standardizing deployment and configuration practices.
- Extended and hardened 40+ existing Terraform modules to improve security posture, consistency, and reusability across infrastructure.
- Introduced Tech Radar and ADRs, standardizing technology choices and platform practices across the engineering team.
- Served as infrastructure platform support layer for development teams - helping them build, deploy, and observe their work reliably.
- Cut average deployment time by ~30% through pipeline optimization and parallelized build/test stages.

- Reduced rollback incidents by ~20% by improving release consistency and Helm chart standardization.
- Technologies: Kubernetes (bare-metal, Rancher), Helm, Vault, Terraform, GitLab CI/CD, Docker, Prometheus, Grafana, Python, Bash, Linux.

opinov8 / GfK (Global market research and consumer intelligence company providing data analytics to retail and FMCG brands)

Apr 2021 - Dec 2023

Site Reliability Engineer

Remote

- Owned platform reliability for production services through proactive monitoring, incident response, and production troubleshooting.
- Built and maintained observability and alerting infrastructure with Prometheus/Grafana covering 20+ services - metric design, alert tuning, dashboards.
- Automated cloud infrastructure provisioning with Terraform across GCP and AWS environments - VPCs, load balancers, DNS, firewall rules, compute resources.
- Implemented DevOps practices that accelerated delivery workflows and shortened release cycles across engineering teams.
- Extended SRE practices and tooling to a cross-functional ML/data science team, enabling consistent deployment patterns for non-core engineering workloads.
- Participated in on-call rotations, led post-incident reviews, and drove systemic improvements to prevent recurrence.
- Created and maintained technical documentation, runbooks, and architecture diagrams for production systems.
- Cut average incident MTTR by ~25% through observability improvements and proactive alerting.
- Shortened release cycle time by ~30% by implementing DevOps practices and CI/CD automation.
- Technologies: GCP, AWS, Kubernetes, Terraform, GitLab CI/CD, Prometheus, Grafana, ELK, Python, Bash, Vault, Docker.

Luxoft Kyiv (Swiss-based global IT service provider delivering software engineering and digital transformation to enterprise clients)

Jan 2021 - Mar 2021

DevOps Engineer

Remote

- Built Jenkins CI/CD pipelines for Yocto Linux image builds, automating recurring engineering workflows for embedded systems.
- Developed Python automation scripts and reporting utilities using the JIRA REST API for project visibility.
- Supported Agile delivery by improving CI stability, pipeline reliability, and developer tooling.
- Technologies: Jenkins, Python, JIRA REST API, Yocto, Linux, Bash.

QubitLabs (Software development company building cloud-native applications and data platforms for startups and SMBs)

Jan 2020 - Jan 2021

DevOps Engineer

Remote

- Maintained and improved cloud infrastructure on GCP - compute resources, networking, and managed services.
- Built backup automation for GCP Memorystore and Neo4j using Bash and Kubernetes CronJobs, ensuring data durability and disaster recovery readiness.
- Supported CI/CD workflows with GitHub Actions, Spinnaker, and GCP integrations for automated build and deployment.
- Implemented monitoring and alerting with Prometheus/Grafana and Slack notifications for production services.
- Worked across Docker, Nginx, Redis, Neo4j, RabbitMQ, and OAuth2-based services.
- Technologies: GCP, Kubernetes, Docker, GitHub Actions, Spinnaker, Prometheus, Grafana, Redis, Neo4j, RabbitMQ, Nginx, Bash, Python.

IdeaSoft (Software development company specializing in blockchain and fintech solutions, including cryptocurrency exchange platforms)

Nov 2019 - Jan 2020

DevOps Engineer

Remote

- Implemented DevOps practices for a cryptocurrency exchange platform on AWS (EC2, S3), improving release speed and reliability.

- Built Jenkins-based CI/CD pipelines with GitHub webhooks for automated build and deployment.
- Migrated AWS database workloads and configured Nginx for AngularJS application delivery.
- Integrated Elasticsearch/Kibana to improve application behavior analysis and troubleshooting.
- Technologies: AWS (EC2, S3), Jenkins, GitHub, Nginx, Elasticsearch, Kibana, Docker, Linux, Bash.

Ukrtelecom (Ukraine's largest national telecommunications operator)

Feb 2019 - Nov 2019

Linux System Administrator

Kyiv, Ukraine

- Maintained and administered computer networks and related computing environments including computer hardware, systems software, applications software, and all configurations.
- Recovery of CentOS servers after system failures - root cause analysis, LVM management, filesystem repair.
- Bash scripting for automation of routine administrative tasks and system monitoring.
- Managed MySQL databases, NGINX web servers, and load balancing configurations.
- Technologies: CentOS, Linux, LVM, Bash, MySQL, NGINX, Load Balancing.

Intertelecom (Ukrainian CDMA telecom operator)

May 2017 - Nov 2017

Telecommunications Engineer

Kharkiv, Ukraine

- Serviced mobile BTS (Base Transceiver Station) equipment for CDMA network infrastructure.
- Setting and replacing telecom equipment at cell sites.
- Installation of radio relay and sector antennas for network coverage expansion.
- Updated configurations and firmware on telecom equipment.
- Technologies: CDMA, BTS, Radio Relay, Sector Antennas, Firmware Updates.

PROJECTS

Clients (B2B)

CARiD (US e-commerce, automotive parts) - opinov8/GfK (global market research) - Luxoft (Swiss IT service provider) - QubitLabs (cloud-native apps) - IdeaSoft (blockchain/fintech) - Upwork clients (multiple DevOps/SRE engagements).

Intend - AI-Powered Habit Tracker Pet Project

AI-powered habit tracker app. GCP infrastructure and CI/CD pipeline built from scratch to release. https://intendmobile.com

GCP, CI/CD, AI

EDUCATION

Information & Communications Networks Kharkiv National University of Radioelectronics 2016

Diploma: Analysis of 5th Generation Switching Networks.

CERTIFICATIONS

Professional Cloud DevOps Engineer	Google Cloud	2024 (Issued May 25, 2024 - Expired May 25, 2026)
Associate Cloud Engineer	Google Cloud	2024 (Issued April 27, 2024 - Expires April 27, 2027)

SKILLS

Cloud (GCP): VPCs, Load Balancers, DNS, Cloud Router, NAT, Firewall Rules, GCE, Cloud Run, Cloud Monitoring, Cloud Logging

Infrastructure as Code: Terraform (40+ modules hardened)

Containers & Orchestration: Docker, Kubernetes (GKE + bare-metal/Rancher), Helm

CI/CD: GitLab CI/CD, GitHub Actions, Google Cloud Build, Jenkins, Spinnaker, Flux

Observability: Prometheus, Grafana, ELK/Kibana, GCP Cloud Monitoring, Cloud Logging

Networking: TCP/IP, DNS, HTTP(S), SSH, L2/L3, VPNs, Routing, Switching, VPC Design

Platform Components: Nginx, Redis, RabbitMQ, Neo4j, Vault, MySQL, PostgreSQL

Scripting & Automation: Python, Bash, SQL

Security & Compliance: IAM Least-Privilege, VPC Service Controls, Vault Secrets, Backup & Disaster Recovery

Operating Systems: Linux (Debian, Ubuntu, CentOS), Unix
