LOCATION & AVAILABILITY

Poland, Wroclaw
Non-EU (Ukrainian) · EU Blue Card eligible (§ 18g AufenthG)

LANGUAGES

English — B2+ (professional working proficiency; 2.8 yrs in fully English-speaking team)
Ukrainian — native
Russian — native
German — A1 (learning)

CERTIFICATIONS

Google Cloud Associate Cloud Engineer
Apr 2024 – Apr 2027

Profile Summary

Senior DevOps / SRE Engineer — 9+ years across telecom infrastructure, cloud platforms and on-prem Kubernetes, including 4 years of production GCP and 2.8 years in a fully English-speaking team (GfK). Day-to-day focus: Kubernetes operations (on-prem Rancher, multi-environment fleets), generic Helm chart architecture, GitLab CI/CD and GitHub Actions pipelines, Vault integration and observability tooling (Prometheus/Grafana; SLO approach via Sloth — familiar). B2B contractor via Polish JDG; based in Wroclaw, full CET overlap; relocation to Germany possible.

Core Skills

Kubernetes & Rancher Ops ●●●●● **on-prem Rancher fleets, manifests, deploy, quotas · GKE**

Helm & Docker ●●●●● **chart architecture, legacy-to-Helm migration (20+ services); Dockerfiles, compose**

CI/CD & GitOps ●●●●○ **GitLab CI (15+), GitHub Actions (Cloud Build→GHA), Jenkins as-code · Flux, ArgoCD**

Linux & Terraform ●●●●○ **CentOS admin, LVM, filesystem recovery · Nginx/HAProxy · Terraform (modular codebases)**

Cloud ●●●●○ **GCP (compute, networking, permissions, Vertex AI, Memorystore) · AWS (EC2/S3, RDS, OIDC)**

Secrets & Practices ●●●○○ **Vault integration · ADR · SLO via Sloth (familiar)**

AI Tooling ●●●○○ Claude, Cline, Ollama, LM Studio — AI-assisted engineering & local LLM serving

Also: Linux/CentOS, LVM, Nginx/HAProxy · Terraform (modular codebases) · Python & Bash automation · MySQL/PostgreSQL (basic ops) · Redis · Java coursework (payments app)

Work Experience

CARiD · US e-commerce, automotive parts — Oct 2024 – Oct 2025

DevOps Engineer | Remote

- Designed and rolled out a generic Helm chart architecture for 20+ microservices (legacy PHP + new stack), migrating teams off deprecated Rancher-CLI manifests — unified and simplified deployment and maintenance across on-prem Rancher-managed Kubernetes clusters.
- Updated GitLab CI/CD pipelines (15+ microservices) to the new chart-based deployment workflow, delivered to clusters via ArgoCD (GitOps).
- Integrated services into HashiCorp Vault — migrated application secrets out of Kubernetes; Vault infrastructure run by another team member.
- Introduced Tech Radar and ADR (Architecture Decision Records) process on own initiative, aligning technology decisions across a multi-engineer DevOps team.
- Oct 2025 – Present — Career break (planned pause — relocation period)

opinov8 / GfK · global market research — Apr 2021 – Dec 2023

Site Reliability Engineer | Remote

- Operated a fleet of Kubernetes clusters and environments on a large GCP-based analytics platform — routine cluster maintenance, manifest updates, service deployments, developer-request support (permissions, GitLab runners, quotas, logs), and Flux-based GitOps delivery across the fleet.
- Bridged the DevOps and Data Science teams — supported scientists' pipelines on Vertex AI (training resources, notebooks) and carried shared DevOps practices into the science team.
- Maintained on-prem Airflow after its migration from GCP Marketplace — version upgrades and cluster upkeep.
- Integrated AWS OIDC credential providers through the platform's Terraform module architecture.
- Managed permissions workflows across the platform, including Active Directory-based integration.

Valentyn Fiedietsov | Senior DevOps / SRE Engineer — DevOps · SRE · Cloud Infrastructure · GCP · Kubernetes · Terraform

Work Experience

Luxoft Kyiv · Swiss global IT service provider — Jan 2021 – Mar 2021

DevOps Engineer | Remote

Built Jenkins pipelines as code for Yocto Linux image builds, automating recurring embedded-systems workflows.

Automated handling of ALM Octane tickets by defined criteria — saving many manual triage hours annually.

QubitLabs · cloud-native apps and data platforms — Jan 2020 – Jan 2021

DevOps Engineer | Remote

Managed GCP resources and permissions (compute, networking, Memorystore/Redis) with a cost-optimization focus.

Migrated CI/CD pipelines from Cloud Build to GitHub Actions for richer integrations and lower cost.

Supported developers with deployments and CI/CD issues — e.g., debugged a Go Cloud Function that passed locally but failed on deployment.

IdeaSoft · blockchain / fintech, crypto exchange — Nov 2019 – Jan 2020

DevOps Engineer | Remote

Introduced the first CI/CD pipelines (Jenkins) for the platform — the team previously shipped without any CI/CD.

Migrated a database workload between AWS regions.

Set up Elasticsearch/Kibana aggregation of Nginx logs used for reporting.

Ukrtelecom · Ukraine's largest telecom operator — Feb 2019 – Nov 2019

Linux System Administrator | Kyiv, Ukraine

Administered CentOS servers — failure recovery with root-cause analysis, LVM and filesystem repair; managed MySQL.

Organized Nginx as a load balancer (HAProxy used in some parts of the stack); automated routine administration with Bash.

Intertelecom · CDMA telecom operator — May 2017 – Nov 2017

Telecommunications Engineer | Kharkiv, Ukraine

Serviced CDMA BTS cell-site equipment (radio relay, sector antennas, firmware) as part of an incident-response field team — first exposure to incident management.

Education

Kharkiv National University of Radioelectronics — BSc, 2016

2015 — Introduction to Software Testing, Ukrainian IT School, Kharkiv (QA certificate No. QA1504)

2016 — Java Core + EE courses; built "payments" web application in Java (github.com/skindar/payments)

Work Authorization

Non-EU (Ukrainian citizen) — EU Blue Card eligible (§ 18g AufenthG, experienced IT-professional route). Independent B2B contractor: invoicing via Polish entity (Intend Technologies JDG) — no visa sponsorship required for B2B engagements. Based in Wroclaw, Poland with full CET overlap; relocation to Germany possible for on-site roles.

Wroclaw, 28.10.2026
